What do you value most in a plant recording system?

- Where are we now?

- Demonstration of what is there

- Plans for future development

- What would you like to see in a future system?

…the future

- Updated picture handling

- Folders for files

- Create your own queries and reports

- More customisation

- Synonyms

- Map from geolocations of wild collected accessions

- Herbarium Records

- Integration with CMD

Plant Heritage

What do you value most in a plant recording system

What are the barriers to using Persephone

Duplication of existing records

Forget how to use it

On going training for new Collection holders.

none as far as I'm concerned!

Time to learn a new system Help getting started

No collection!

non-standard

Time

Training

Technophobia!

Inflexible

Phone coverage

Nomenclature

Infrequent use

Details

Interface

seemed complicated

Technological knowledge

Help when I get stuck

What additional features would you like added to Persephone?

Maybe an AR facility like we say yesterday from Candide!
Could there be a feature like Alexa that you could input and ask questions to get answers immediately
To use without a collection
Haven't used it enough to know yet.!
Calendar entries eg when flowering, then display visual comparison
Warning if you're leaving a page without saving
Enhanced photo handling
Very Short YouTube videos showing how to do X,y
Dictation function

Thank you
